

### 14.5.11 MS DECODER.

The “**MS DECODER**” sub menu appears only in the “**FAT**” mode and permits to switch on or of the MS decoding for the headphones. The “**M**” channel corresponds to the left channel input, the “**S**” channel corresponds to the right channel input. The “**ON (-6 dB)**” is to reduce the saturating danger in case that the recording is made with high input levels.

### 14.5.12 START / STOP CONFIGURATION.

When “**Record/New index**” is selected, the machine can be put into record via the 3.5 mm “**Start /Stop**” input. The first time the input is momentarily shorted out, the machine starts recording, the next time, it starts a new recording (seamless). When “**Record/Stop**” is selected, the machine starts recording at a momentarily short-circuit on the “**Start /Stop**” input, and stops recording

on the next short-circuit.

If “**Record/Mark**” is selected, the machine starts recording if the input is briefly shorted out, afterwards every time the input is briefly shorted, it adds a marker.

If “**Mark (Rec & Play)**” is selected, when briefly shorted out, it will only add markers.

When “**Start / Stop**” is selected, the machine starts recording if the input is shorted and stops recording if the input is oopen.

When “**Fader start**” is selected, the machine can be put in playback. Short-circuit the input will select the play mode.

Mode/ Function	1 <sup>st</sup> contact	2 <sup>nd</sup> contact	Break contact
Rec / New index	Record	Record new index	x
Rec / Stop	Record	Stop	x
Rec / Mark	Record	Insert marker	x
Mark / (Rec Play)	Insert marker	Insert marker	x
Start / Stop	Record	Record	Stop
Fader start	Playback	Playback	Stop

### 14.5.13 AUTOMATIC SKIP.

When “**On**”, and pushing playback from the directory or the main menu, the playback will continue non-stop until the end of the card.

When “**Index loop**” is chosen, only the selected index will be played back in loop mode. To select another index use the skip keys (3) & (6). To playback the same file, press the “**REWIND**” key (3) shortly and push play again.

### 14.5.14 RED LED LEVEL.

As standard, the red led on the modulometer turns on when the level reaches minimum 0 dB. Four different reference selections can be made. Beware that if the +9 dB is selected, the red led indicates overload.

## 14.6 AUTO RECORD.

The “**AUTO RECORD**” menu permits to turn on or off the auto record mode. This mode of recording permits to start a recording automatically depending on the settings of the different parameters described below. Once the parameters set, put the machine in the record mode. The recording will start once the requested level and length of any incoming sound is obtained.

The “**TRIGGER LEVEL**” sub-menu permits to adjust the level detection to start the recording and can be set in steps of 10 dB from 50 dB SPL peak to 120 dB SPL peak.

The “**TRIGGER DELAY**” menu permits to adjust the continuous duration or length of the sound level before the recording starts. It can be set from 0.0 seconds to 1 second. Example: if you clap your hands a single time and the start delay is set to 0.1 second, the recording will not start, as the handclap was shorter than 0.1 seconds.

The “**STOP DELAY**” permits to adjust the duration of recording once the sound level drops below the threshold level and can be set from 5 seconds up to 15 minutes or non-stop. Once the delay is passed, the machine will return to the waiting position ready for the next recording

The left picture shows the machine ready to record automatically. The right picture shows the machine in the record mode.

The Ares-BB+ can also be stopped manually by pressing the Stop button (4).

## 14.7 INPUT.

This menu gives access to the selection of the microphone type (routing, Mono or Stereo) as well as the 48V power supply.

### 14.7.1 INPUT TYPE.

Mike type selection	Mono	Mono	Stereo	Stereo
File format selection	Mono	Stereo	Mono	Stereo
1 mike connected (L)	L only	L = R		
2 mikes connected			L + R -3dB	L & R

If “**STEREO**” is selected and a stereo pair of microphones is connected and the “**FILE FORMAT**” is set to a mono recording, both channels will be mixed and reduced by 3 dB before they are recorded as a mono channel.

If “**MONO**” is selected and a mono microphone is connected to the left input and the “**FILE FORMAT**” is set to a stereo recording, the left and right channel will be identical.

## 14.7.2 48V MIKE POWER.

If Phantom microphones are used the 48V must be turned on. This selection needs to be confirmed by pressing the right arrow key. On the main display, the text  will appear next to the battery status.

## 15 LOCKING THE SETTINGS.

By pressing a certain combination of keys when turning on the machine, the settings can then be locked step-by-step. This is to prevent, the user changing the settings inadvertently or otherwise. To obtain the combination code, contact your local **NAGRA** dealer.

Almost all sub-menus can be locked by pressing the **"STOP"** button or unlocked by pressing the **"PLAY"** button. When the sub-menu has been locked, a closed padlock appears in front of the selected sub-menu. When the sub-menu has been unlocked, the closed padlock disappears. To remove the password, switch off and on again the machine.

## 16 LOCKING THE KEYPAD.

During record or playback the keyboard can be locked by setting the keypad switch (15) to ON. To unlock the keyboard, set the same switch back to OFF. When the keypad is locked, the message **"KEYPAD LOCK"** appears on the display.

## 17 AUTO POWER OFF

When the machine is left in the **"STOP"** mode for 10 minutes, it will automatically switch off. During the last 14 seconds of that period, the beep sounds every second. When any key is pressed, the power counter will be reset.

To disable the auto power off, **from the power off status**, press and hold the centre key while pressing the power key.

In the case that the machine is turned on with the auto power disabled, the message **"NO AUTO POWER OFF"** appears during a few seconds.

## 18 MESSAGES

**"WRONG USB VERSION"**

DSP and USB software versions are incompatible

**"CARD FULL"**

No more memory available on the card

**"OPEN WRITE ERROR"**

Defective card or card error

**"WRITE ERROR"**

Defective card or card error

**"READ ERROR"**

Defective card or card error

**"CARD TOO SLOW"**

Depending from the selected file format, some cards do not accept a high recording bit rate

**"DIRECTORY FULL"**

Index #999 exist already

**"CARD NEARLY FULL"**

60 seconds recording time left on the card

**"KEYPAD LOCKED"**

The full keypad is locked

**"AUTO POWER OFF"**

The machine will switch of in the next 15 seconds

**"LOW BATTERY"**

The battery voltage has dropped too low

**"NO AUTO POWER OFF"**

Auto power off has been disabled

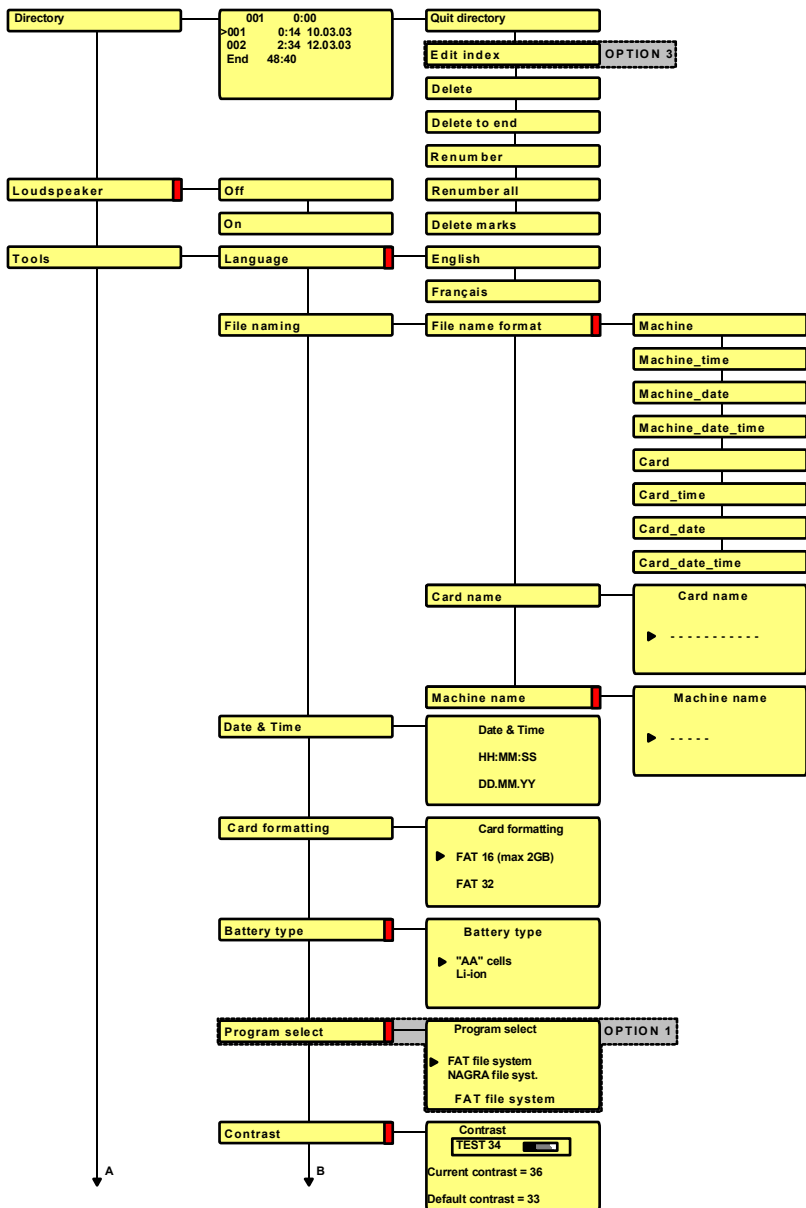

"INVALID CARD"	The card is not recognized by the machine
"NO CARD"	No card inserted in the slot
"UNKNOWN FORMAT"	The card is recognized but not the type of format
"DIR UNUSABLE"	The "ARESP" folder cannot be created Example: an ARESP file name was already present
"CARD READING..."	Appears during the directory reading
"CARD BUSY..."	Appears when the card is busy Example: delete to end or renumbering
"USB MODE"	The card is accessed via USB
"AUTO REC. LEVEL ERROR"	The input gain is not suitable versus the record trigger level
"UNABLE TO CREATE INDEX"	During saving in edit mode
"ABORTED"	During saving in edit mode
"FAILED"	Example: During mark(s) erase
"THE CARD IS IN USE"	An action was requested without being in the "STOP" mode
"NO INDEX SELECTED"	Example: Trying to delete an index without having selected one
"NO MARKS IN INDEX NNN"	During mark(s) erase
"MARKS IN INDEX NNN CANNOT BE DELETED"	Can happen if the marks are added using an external editor.

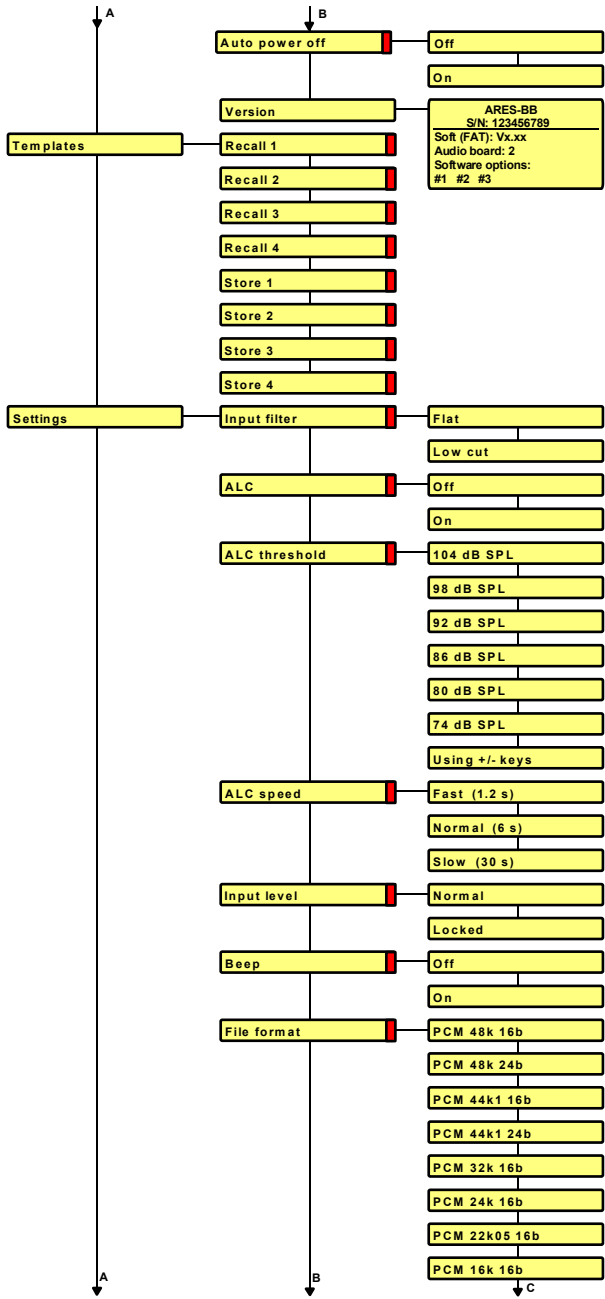

## 19 SOFTWARE UPDATE

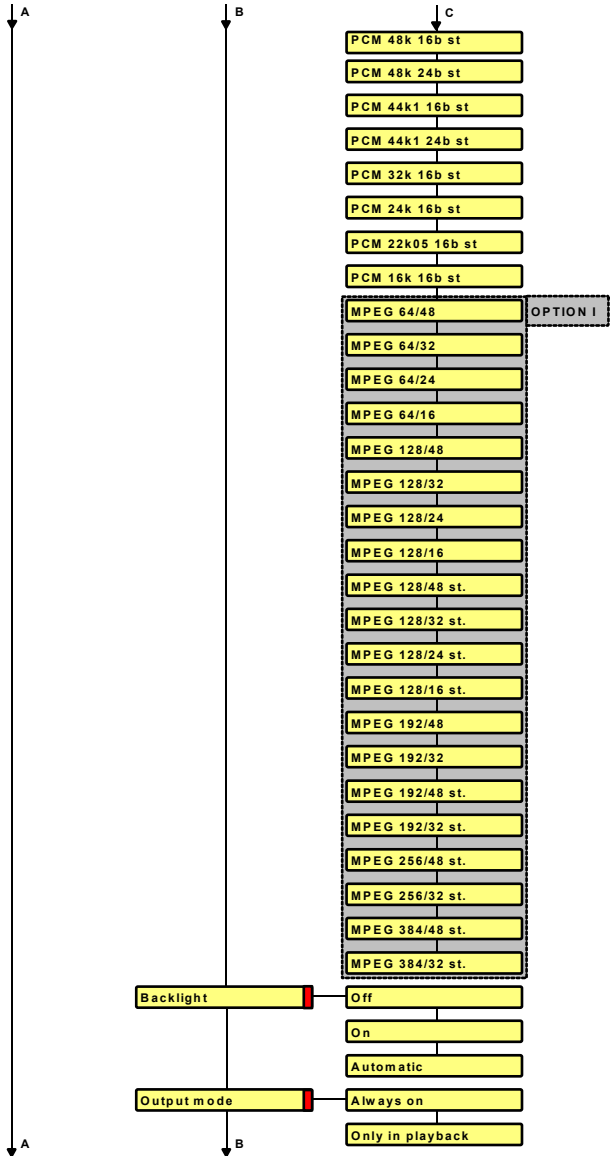

A small black 6 pin connector is located just under the flashcard. A special adapter "**NP-PCA**" is needed to connect the machine to the RS232 connector of the PC or laptop. When new software from NAGRA becomes available, it can be delivered by Email or it can be downloaded from the NAGRA web site. By using the PC software called "**PuserLoader**" the machine can be updated with the new software version. This takes about 2 to 3 minutes.

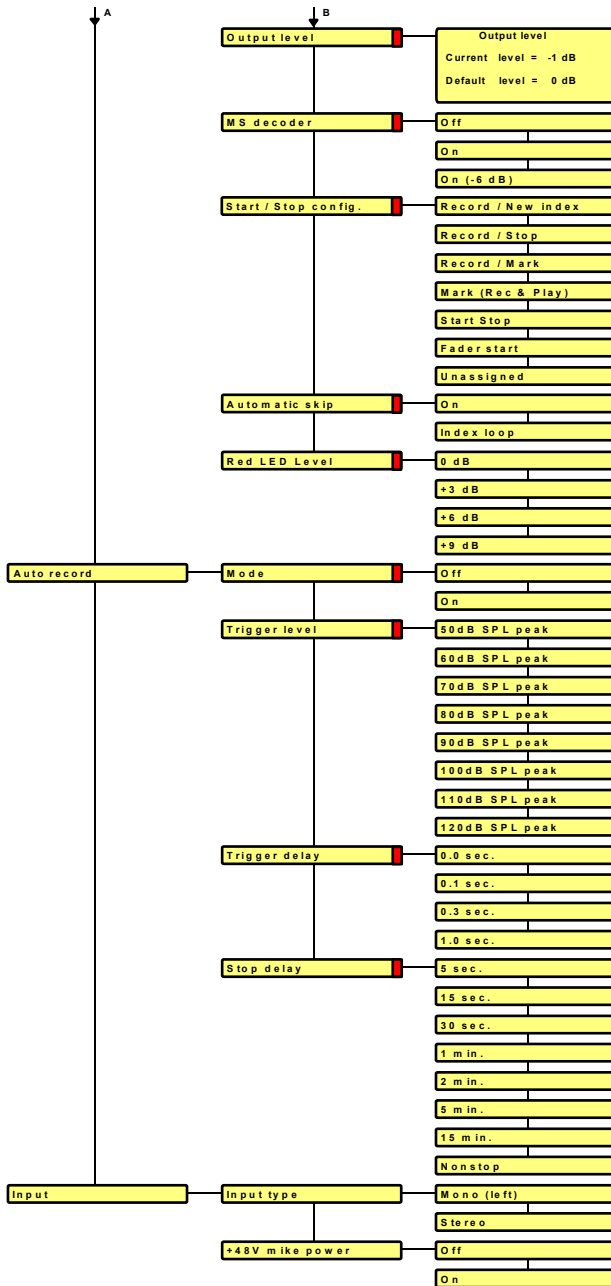

# 20 MENU TREE ARES-BB<sup>+</sup>

## ARES-BB<sup>+</sup> (FAT MODE) INCLUDING SOFTWARE OPTION #1 AND #3

## 21 INPUTS, OUTPUTS

### 21.1 INPUT SIDE

Mic. / Line Inputs	2 XLR connectors
Microphone Powering	48 V Phantom via menus
Microphone Sensitivity	10 mV, 2mV Pa switchable
Sensitivity	From 2 mV to 10 mV for 0 dB recording
Line Input	Symmetrical transformerless
Line Input Sensitivity	0.44 V to 1.4 V for 0 dB recording
External power	XLR connector 4 pole or DC connector
Green led	External power presence indicator
Yellow led	Charge indicator
USB connector	USB 1.1

### 21.2 OUTPUT SIDE

Headphone	Jack 6.3 mm stereo connector
Potentiometer	Adjust the headphone output level
Line Output	2 XLR connectors, symmetrical transformerless
Start/Stop remote	Mini jack mono 3.5 mm
Software update	Small 6 pin connector for NP-PCA adapter
THD at 1 kHz	0.1 %
Frequency response	30 Hz – 20 kHz (-3 dB in EE mode)
Total dynamic range	80 dB

## 22 ARES-BB<sup>+</sup> PC SOFTWARE & INSTALLATION (NFS MODE)

These programs add several features when the ARES-BB<sup>+</sup> is connected to the USB port of a PC or if the flashcard from the ARES-BB<sup>+</sup> is inserted in a PC PCMCIA slot:

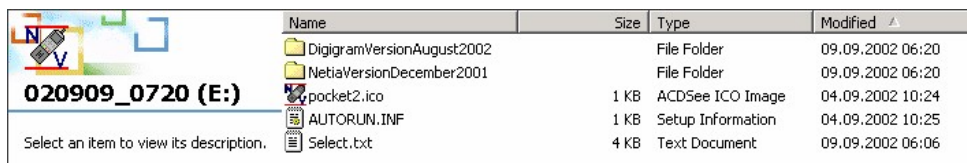

Display the directory of the flash card

Playback of the recorded files

Import recorded files into the computer's hard disk

Edit the recorded files.

Insert the CD in your PC or laptop and follow the instructions.

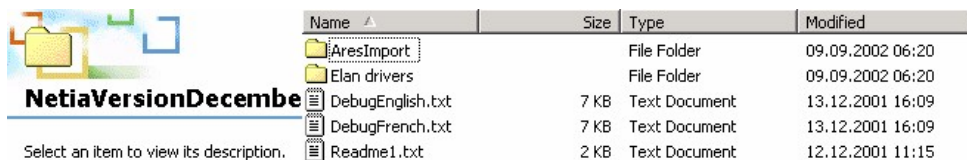

Name	Size	Type	Modified
DigigramVersionAugust2002		File Folder	09.09.2002 06:20
NetiaVersionDecember2001		File Folder	09.09.2002 06:20
pocket2.ico	1 KB	ACDSee ICO Image	04.09.2002 10:24
AUTORUN.INF	1 KB	Setup Information	04.09.2002 10:25
Select.txt	4 KB	Text Document	09.09.2002 06:06

### 22.1 ARES-BB<sup>+</sup> SOFTWARE, USING A PC PCMCIA SLOT (NFS MODE)

Carefully read the text file in the root directory before any installation.

From explorer, double click the NetiaVersion folder followed by the AresImport folder.

Name	Size	Type	Modified
AresImport		File Folder	09.09.2002 06:20
Elan drivers		File Folder	09.09.2002 06:20
DebugEnglish.txt	7 KB	Text Document	13.12.2001 16:09
DebugFrench.txt	7 KB	Text Document	13.12.2001 16:09
Readme1.txt	2 KB	Text Document	12.12.2001 11:15

Double click "SETUP.EXE" file to start the installation.

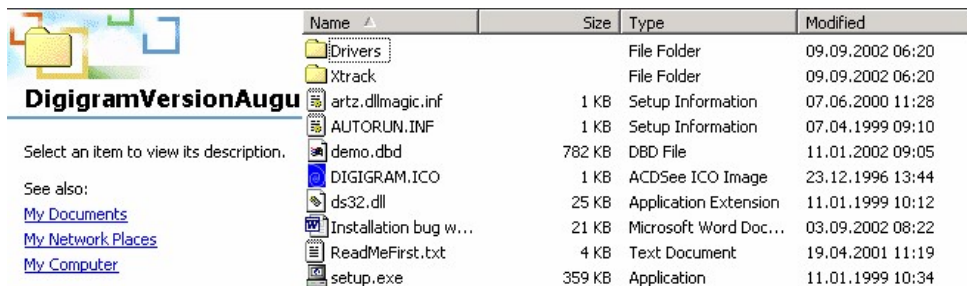

If the PCMCIA slot is based on an ISA or PCI bus or built-in to a laptop, the Elan drivers need also to be installed. If the PCMCIA slot is connected via SCSI, the Elan drivers may not be installed.

### 22.2 ARES-BB<sup>+</sup> SOFTWARE, USING A PC USB PORT (NFS MODE)

This only works if both software options I & II are installed on the Ares-BB<sup>+</sup>

Carefully read the text file in the root directory before any installation.

From explorer, double click the DigigramVersion folder followed by setup.exe.

Name	Size	Type	Modified
Drivers		File Folder	09.09.2002 06:20

**AresImport:**

AresImport permits to read the directory from the flash card as well as playback and or import and conversion.

**RCXLoad:**

Display the files located on the memory card with their characteristics (date, duration, encoding format) in an MS explorer fashion.

Playing back a selected file, using the ARES-BB+ audio output or the local PC sound card.

Using Drag and Drop, import one or several files with format conversion to MPEG Layer 2 or PCM format.

**XtrackLE (a Limited Edition of Xtrack):**

Uses the physical I/O of the RCX220 as well as any other standard device.

Offers two fully independent mono or stereo tracks where records can be uploaded via RCXload.

Provides you with of a complete set of tools to cut, copy, paste, trim any portion of a track, as well as level editing functions such as fade in and fade out.

Once the edit finished, it can be processed into a single sound file (**MPEG** or **PCM**) with automatic sampling frequency and bit rate conversion.

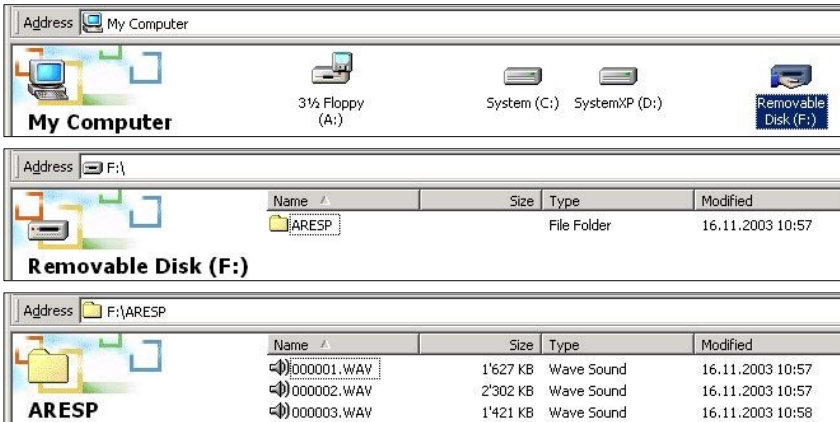

To obtain full multi-track editing capabilities including mp3 export, the full version of Xtrack software can be purchased from Digigram.

**23 ARES-BB+ PC DRIVERS & INSTALLATION (FAT MODE)**

Turn on the Ares-BB+ and connect it via the USB cable to the PC or Mac. After a moment, the new device will be detected as an external removable hard drive.

**IMPORTANT: for Windows 98 SE users; connect the Ares-BB+ (FAT mode) to the PC. Once Windows asks for the USB drivers to be installed, specify the way to the CDR "Win98SeUsbDrivers" folder.**

The following pictures are an example on PC were the ARES-BB+ is recognized as disk (F).

On PC, to remove the Ares-BB+ from the USB connection, double click first the "Unplug or Eject Hardware" icon and stop the corresponding drive letter before removing the USB cable.

## 24 FLASH CARDS COMPATIBILITY.

**Note:** We have not tested all available cards and adapters on the market. Therefore we cannot guaranty the perfect operation in our machines. Cards and adapters supplied by Nagra are guaranteed to operate within the machine specifications.

**Formatting:** Do not format cards on PC but only on the Ares-BB<sup>+</sup>.

The following cards and adapters are used and tested by Nagra:

Compact flash:	ACE	64MB	FC064
	ACE	128MB	FFC128
	PRETEC	256MB	CFH256
	PRETEC	512MB	40x
	PRETEC	1GB	40x
Micro drive:	HITACHI	1GB	DSCM-11000
	IBM/HITACHI	4GB	13G1762
PCMCIA adapter	DATAFAB		TYPE I/II
	PRETEC		CF <sup>+</sup>
	IBM/HITACHI		13G1037

Cet index a été créé	This index was created	1	max. 22 chars.

avec une ancienne version de l'ARES-C.	with an old version of ARES-C.	2	max. 22 chars.
Ce titre ne peut pas être modifié.	Title can not be changed.	3	max. 22 chars.
Stop = Abandon	Stop key = Escape	1	max. 22 chars.
Lecture = Effacer	Play key = Delete	2	max. 22 chars.
>> = Insérer	>> key = Insert	3	max. 22 chars.
Enreg. = Sauvegarder	Rec. Key = Write it	4	max. 22 chars.
Carte invalide!	Invalid card!		max. 22 chars.
Carte présente.	Card present.		max. 22 chars.
Carte non-formatée.	Unformatted card.		max. 22 chars.
Trop d'index.	Too many index.	1	max. 22 chars.
Accès aux 408 premiers index?	Access first 408 indexes?	2	max. 22 chars.
Fichier non-fermé.	Unclosed file.	3	max. 22 chars.
Récupérer?	Recover?	1	max. 22 chars.
		2	max. 22 chars.
		3	max. 22 chars.
Erreur X	Error X		max. 22 chars.
index XXX corrompu.	index XXX corrupted.		max. 22 chars.
Eff. -> fin de carte?	Clean to end of card?		max. 22 chars.
Format sans problème.	No format problems.		max. 22 chars.
408 index disponible.	408 indexes available.		max. 22 chars.
Effacement...	Cleaning...		max. 22 chars.
Logiciel (NFS)	Soft (NFS):		max. 16 chars.
GAIN INADAPTE	AUTO REC LEVEL ERR.		max. 20 chars.
REPertoire PLEIN	DIRECTORY FULL		max. 19 chars.
ERREUR VERSION USB	WRONG USB VERSION		max. 19 chars.
Clavier verrouillé	Keypad locked		max. 19 chars.
CARTE PLEINE	CARD FULL		max. 19 chars.
ERREUR D'OUVERTURE	OPEN WRITE ERROR		max. 19 chars.
ERREUR D'ECRITURE	WRITE ERROR		max. 19 chars.
ERREUR DE LECTURE	READ ERROR		max. 19 chars.
CARTE TROP LENTE	CARD TOO SLOW		max. 19 chars.
CARTE QUASI PLEINE	CARD NEARLY FULL		max. 19 chars.
EXTINCTION AUTOM.	AUTO POWER OFF		max. 19 chars.
BATTERIE DECHARGEE	LOW BATTERY		max. 19 chars.
Extinct. désactivée	No auto power off		max. 19 chars.
CARTE PROTEGEE	CARD WRITE PROTECT		max. 19 chars.
TAMPON DEBORDE	BUFFER OVERFLOW		max. 19 chars.
CLAVIER VERROUILLE	KEYPAD LOCKED		max. 21 chars.
Presser & maintenir	Press & hold	1	max. 22 chars.

les touches ◀ & ▶ pour le déverrouiller.	left & right keys to release.	2	max. 22 chars.
CARTE INVALIDE	INVALID CARD	3	max. 22 chars.
PAS DE CARTE	NO CARD		max. 21 chars.
FORMAT INCONNU	UNKNOWN FORMAT		max. 21 chars.
REPERT INUTILISABLE	DIR UNUSABLE		max. 21 chars.
Lecture...	Card reading...		max. 21 chars.
Carte occupée...	Card busy...		max. 21 chars.
Mode USB	USB mode		max. 21 chars.
FORMAT CORROMPU	FORMAT CORRUPTED		max. 21 chars.
ERREUR LECTURE CARTE	CARD READ ERROR		max. 21 chars.
CARTE NON-FORMATEE	UNFORMATTED CARD		max. 21 chars.
Mode distant	Remode mode		max. 21 chars.
Entrée	In		max. 7 chars.
Sortie	Out		max. 7 chars.
Seuil	Thr		max. 7 chars.
Muet	Off		max. 5 chars.
Index	Index		max. 6 chars.
Début	Begin		max. 9 chars.
Fin	End		max. 9 chars.
Stop boucle	End loop		max. 19 chars.
Ecoute boucle/Ajust	Listen loop/Trim		max. 19 chars.
Placer une coupe	Place cut		max. 19 chars.
Ajust segm. gauche	Slide left segment		max. 19 chars.
Ajust segm. droite	Slide right segment		max. 19 chars.
Incrément/Ecoute	Step/Listen		max. 19 chars.
Eff. coupe	Delete cut		max. 12 chars.
Restaure seg.	Undo cut out		max. 12 chars.
Eff. segment	Del segment		max. 12 chars.
Fin	Exit		max. 5 chars.
Index XXX	Index XXX		max. 22 chars.
Durée édit.:	Edit length:		max. 12 chars.
Reste carte:	Remain:		max. 12 chars.
Edition	Edit		max. 7 chars.
Sauvegarde	Save		max. 10 chars.
Abandon	Quit directory		max. 22 chars.
Index XXX créé	Index XXX created		max. 22 chars.
Erreur de lecture	Read error		max. 22 chars.
Erreur d'écriture	Write error		max. 22 chars.
Err. creation d'index	Unable to create index		max. 22 chars.
Interrompu	Aborted		max. 22 chars.

Saut automatique	Automatic skip	max. 22 chars.
Index en boucle	Index loop	max. 22 chars.
Config. Start / Stop	Start / Stop config.	max. 22 chars.
Fader start	Fader start	max. 22 chars.
Erreur	Error	max. 22 chars.
Presser une touche	Press any key	max. 22 chars.
Création index XXX	Creating index XXX	max. 22 chars.
Annuler sauvegarde	Abort saving	max. 20 chars.
Format de nom	File name format	max. 18 chars.
Machine	Machine	max. 18 chars.
Machine_heure	Machine_time	max. 18 chars.
Machine_date	Machine_date	max. 18 chars.
Machine_date_heure	Machine_date_time	max. 18 chars.
Carte	Card	max. 18 chars.
Carte_heure	Card_time	max. 18 chars.
Carte_date	Card_date	max. 18 chars.
Carte_date_heure	Card_date_time	max. 18 chars.
Nom de carte	Card name	max. 18 chars.
Nom de machine	Machine name	max. 18 chars.
Niveau d'entrée	Input level	max. 18 chars.
Normal	Normal	max. 18 chars.
Verrouillé	Locked	max. 18 chars.

## 26 SPECIFICATIONS

### GENERAL

Data Storage medium	PCMCIA ATA cards, Compact flash cards, Micro drives
Recording Method	Digital (PCM) or Digital compression
Compression type	ISO MPEG Layer II*
A/D & D/A conversion	20 Bit Sigma-Delta
Sampling Rate	16, 22.05, 24, 32, 44.1, 48 kHz
Bit-Rates	64, 128, 192, 256, 384 kb/s*
Mono/Stereo	Switchable and input routing
Recording Capacity	1 hour 26 minutes on a 1 GB card Stereo 48 kHz PCM, 34 hours 45* minutes on a 1 GB card Mono 48 kHz 64 kb/s
PCMCIA Slot	Single type I & II
Dynamic Range Adjust	50 dB for 0 dB record (manual), 40 dB for 0 dB record (ALC)
Filters	"Flat", "LFA"
File Format	Broadcast Wave Format (.wav)

### INPUTS

Mic. / Line Inputs	2 XLR connectors
Microphone Powering	48 V Phantom
Sensitivity	From 2 mV to 10 mV for 0 dB recording
Line Input	Symmetrical transformerless
Line Input Sensitivity	0.44 V to 2.6 V for 0 dB recording

### OUTPUTS

Headphone	Jack 6.3 mm stereo connector MS decoding
Line Output	2 XLR connectors, symmetrical transformerless
THD at 1 kHz	0.1 %
Frequency response	30 Hz – 20 kHz (-3 dB in EE mode)
Total dynamic range	80 dB

### POWER SUPPLY

Battery pack	6 x "AA" cells
Lithium Ion pack	2400 mAh
Consumption	9 V - 150 mA, 7.2 V – 185 mA during record (no display light)

### PHYSICAL

Dimensions	160 x 168 x 56 mm (6¼ x 6¾ x 2 inch)
Weight	900 g. (2 lb)

(\* including the MPEG option)

Note: We have not tested all available cards and adapters on the market. Therefore we cannot guaranty the perfect operation in the Nagra machines. Cards and adapters supplied by Nagra are guaranteed to operate within the machine specifications.

# DECLARATION DE CONFORMITE DECLARATION OF CONFORMITY

**FABRICANT:** NAGRAVISION S.A. KUDELSKI GROUP, 1033 CHESEaux SUISSE  
**MANUFACTURER:** NAGRAVISION S.A.KUDELSKI GROUP 1033 CHESEaux, SWITZERLAND

**APPAREIL :** ARES-BB<sup>+</sup> & alimentation secteur NB-PSU  
**MODEL:** ARES-BB<sup>+</sup> & mains power adapter NB-PSU

**NORMES APPLICABLES :**  
**APPLICABLE NORMS:**

Champ électromagnétique rayonné <i>Radiated electromagnetic field</i>	EN 55022 Cl. B <i>EN 55022 Cl. B</i>
Perturbations conduites sur secteur <i>Disturbance voltage on mains terminal</i>	EN 55022 Cl. B <i>EN 55022 Cl. B</i>
Immunité aux champs électromagnétiques <i>Immunity to electromagnetic fields</i>	EN 61000-4-3 <i>EN 61000-4-3</i>
Immunité aux décharges électrostatiques <i>Immunity to electrostatic discharges</i>	EN 61000-4-2 <i>EN 61000-4-2</i>
Immunité aux transitoires électriques rapides en salves sur câble d'alimentation <i>Immunity to burst on mains line</i>	EN 61000-4-4 level 2 (1000V) <i>EN 61000-4-4 level 2 (1000V)</i>
Immunité aux transitoires électriques rapides en salves sur câbles d'entrées/sorties signaux <i>Immunity to burst on input/output line</i>	EN 61000-4-4 level 1 (500V) <i>EN 61000-4-4 level 1 (500V)</i>
Immunité aux ondes de choc <i>Immunity to surge</i>	EN 61000-4-5 level 2 (1000V) <i>EN 61000-4-5 level 2 (1000V)</i>
